## ENSURING WELL-BEING IN EVERY DROP

PREMIUM STAINLESS-STEEL PRODUCTS  
SAFE, STURDY & KIND TO THE ENVIRONMENT

# CHAIRMAN'S MESSAGE

It has been more than 3 decades since we started the company. After seeing both the good and challenging time during these years of operation, we are known today as the leading supplier of customised stainless-steel products at competitive prices.

We are immensely proud of our custom-tailored solutions that revolve around well-engineered products, tested over and over again. Through our extensive stainless-steel product range with modern technology, we try to cover almost every requirement of the customers. This wouldn't have been possible without the support of competent employees, dealers, suppliers and above all, loyal customers who stayed with us throughout this remarkable journey.

Moving forward, we will strive for higher goals and continue to provide unparalleled quality products without compromising on safety. Contact us - whether to enquire about our stainless-steel products or to offer your thoughts as to how we can best serve you.

Here's hoping you will continue to support our dream of making clean, refreshing and hygienic water a reality for every home!

Thank you.

# STAINLESS STEEL: AN ALLOY WITH HEALTH BENEFITS

The technology is making headway in providing industrial manufacturers and consumers with innovative choices in materials and utility. Storage Tank manufacturers have gained a lot from advanced tools to facilitate more mechanized product manufacturing. Stainless Steel Tanks are still the number one choice across industries, and the advantages of using a stainless-steel storage tank can outshine other available choices. The biggest advantage of these tanks is their extreme durability, which is highly greater than other types of tanks. Storage tanks are also used for stuff like water, food and chemicals.

Regardless of the introduction of other materials, stainless steel storage tanks remain the most excellent choice in terms of compatibility, durability and rationally priced. These tanks require little maintenance in comparison to the other available options. These materials can account for wear and tear through ordinary tanks in a short interlude. Stainless steel tanks are very durable, and they offer relatively high resistance against rough materials. They will last longer than an ordinary tank and are not affected by any vulnerability. The quality and safety of your product in storage will be the main consideration to you.

Stainless steel is a highly stain resistant metal alloy and is considered an environment-friendly material. The production of stainless steel employs the use of natural resources and energy. It is a long-life material and is recyclable. New stainless-steel items are comprised of approximately 60-70% of recycled material, thereby representing stainless biodegradable. You might think about the future use of a stainless-steel storage tank. Whether you are going to use it for a long time or only for a short time? Is it possible to make the price of the outlay valuable? These questions need a considerable approach because you want to make money from the outlay as soon as it has dished up the intention. Storage tanks made of stainless steel are eco-friendly and 100% recyclable. These tanks can be effortlessly sold to scrap metal collectors, who can pay sufficient amount for your tank.

Stainless steel tanks are easy to clean, hygienic and cost-saving storage alternatives. In comparison to other tanks, they are more advantageous because of established physical and chemical attributes. A tank made of stainless-steel augments the hygiene of the storage items that you are picking to store up. These tanks are not only long-lasting and sturdy

but undeniably very hygienic. If you are keeping drinking water, food, or any other product, you always need to ensure the hygiene and purity part.

The use of stainless-steel storage tanks transmits many advanced qualities, as contrasting to the other materials. If you are looking for the most durable, challenging, sturdy and alluring storage tanks, stainless steel is the best choice.

# STAINLESS STEEL WATER TANKS: ONLY OPTION FOR PURITY

In India, where plastic and concrete tanks already hold a place in the consumers' mind, so usually the question comes why to update or change. So, we have pointed out the facts to assist you in making your decisions.

## Concrete Water Tanks

- Construction and installation time is long.
- Cleaning and maintenance are difficult. Also expensive and time-consuming.
- Lime, which is found in concrete can also leak into the water which results in the contamination in water.
- In Concrete Tank, heat absorption is not there.
- These tanks are not recyclable (No scrap value) and also not Eco Friendly.

## Plastic Water Tanks:

- Plastic reacts with heat and produces BPA Bisphenol-A.
- Phthalic acids are commonly found in

plastic which causes allergies, asthma & pregnancy complications.

- Water stored over time becomes smelly.
- Causes hair loss.
- Supports Algae, Fungi and Bacteria Growth. The growth of such organisms is a normal occurrence in plastic water tanks.
- Regular maintenance required.

## Stainless Steel Water Tank

- SS water tank prevents corrosion.
- Tanks can be customized as per the customer requirements.
- Suitable for extremely large storage requirements. Thin but has high strength and durability.
- It can be recycled and its scrap value is quite high. It's an Eco-friendly product.
- There are no serviceable parts in this tank, so it's easy to clean and maintain. Also, the frequency of cleaning is less.
- Very easy to install at site.

## CUSTOMER TESTIMONIALS

Wide range stainless steel water tanks with a professional team to support on every single stage. Tanks we ordered works great. No doubt, it is the best company in the industry.

- Century Ply

The water tank looks amazing. Great product and excellent service. Will highly recommend Purever Tanks to friends and families.

- Indian Colours

A great deal from Purever with on-time delivery. Next time I need a water tank, I won't look anywhere else.

- A.K. Industry

Highly recommend stainless steel water tanks by Purever. Purchased number of tanks from them over the last few years ranging from 1000 to 3000 L for different sites and have found their quality and service to be excellent.

- Lakme Salon

Excellent product, friendly staff, great experience plus great deal. Product justifying its benefits. We are very happy and would definitely purchase Purever Tanks if any need arises.

-Gopal Das & Sons

A big thank you to Purever Team for all the assistance and professionalism. Outstanding service throughout. I was always kept up to date.

- Bold Kiln Technologies
